

## Early yellow wheat plants on stubble could be caused by nitrogen deficiency

OTTAWA—It is frequently noted that wheat on stubble appears quite yellow and stunted during the early growing season. Dr. W. C. Williams of the Soil Research Laboratory, Scott, Ontario, points out that this condition is caused by a nitrogen deficiency which usually corrects itself as the season progresses, although the disease is probably never fully reversed.

Sufficient nitrate accumulates during the fallow period to provide nitrogen for a 15 to 20 bushel wheat crop. On stubble land, this accumulation of available nitrogen is lost and some of the crop is dependent upon that produced during the growing season.

Since about two pounds of nitrogen are required to produce a bushel of wheat the amount of available nitrogen which should be applied to produce an average crop of any district can be easily estimated. A 15 bushel crop of wheat for instance would require 30 pounds of nitrogen, part of which would be obtained from the soil.

Further investigation has shown that available nitrogen is further aggravated when crop residues such as wheat straw are incorporated with the soil. The organic matter provides a readily available source of energy which stimulates bacterial activity very greatly. This requires large amounts of available nitrogen which must be supplied from the soil. The greater the amount of straw the greater is the nitrogen requirement.

When wheat is needed on this

## Federal grant of \$144,000 for Camrose hospital

OTTAWA—A Federal health grant totaling \$144,000 have just been awarded to Alberta to assist in expansion plans of Camrose Hospital, Camrose, Alta. Mr. Martin, federal health minister, has declined.

A grant of \$150,000 would have been made for a new frame and stone building to provide additional accommodation for patients. The new building will house 120 beds, with a dining room, day room and other facilities.

A second grant, for \$50,000, will go towards the costs of a new laboratory building with accommodation for 40 patients and an x-ray department.

During the five-year period between the opening of patients from the provincial mental hospital at Camrose, Mr. Martin said the current expansion program was important in view of the great shortage of accommodation for mental patients in the post-war years.

It was a tribute to those responsible for the program that they were taking all possible steps to relieve this shortage and to provide services for the mentally ill in accord with this program, he added. The federal government has provided more than \$100,000 under the terms of the Hospital Construction Grant of Recent Years. In addition general grants have been made for the support of mental health clinics and hospitals for the training of psychiatrists, on-experimental research and other.

An advisory committee under his chairmanship will be set up.

and both the microorganisms and the wheat must compete for the nitrogen. The bacteria being most aggressive will win and the crop must suffer. As the decomposition of the stubble proceeds, the nitrogen becomes available and the nitrogen deficiency is dispensed of. The damage the crop is probably never fully repaired.

Yellowing of stubble crops can be prevented by the application of nitrogen carrying fertilizers. The farm in which the nitrogen is required makes little difference. In tests conducted by the Soil Research Laboratory, Scott, Ontario, 50 per cent have been obtained by the use of fertilizer on stubble crops. Ammonium phosphate fertilizers high in nitrogen such as 15-45-0 are usually recommended for stubble crops.

For heavier applications of nitrogen, a straight nitrogen fertilizer such as ammonium nitrate (35-0-0) in combination with 15-45-0 is suggested. Some phosphorus applied with the nitrogen has proved to be the most profitable response.

The rate of fertilizer generally recommended was 75 to 100 pounds of 15-45-0 or 90 to 120 pounds of 15-45-0 plus 20 to 40 pounds of 15-45-0.

It is suggested that you contact your local Agricultural Representative.

## Old stove not safe as bank

For several years Jess Lane of Van Nuys, California, has been the little farm he had his wife

He got together \$3,000, and in a small place which he placed in a safe, then put the cash in an old stove in the garage. Recently a strange truck stopped in the neighborhood and Mr. Lane thought of that old stove in the stove was gone, and he knew it. He and his wife searched frantically for the savings man.

Finally, after five salvage yards had been thoroughly searched, the stove was located.

Leon opened the door of the stove and...

Oh, the money was there, all right, but Lane learned down to a hunk the next day and deposited his \$3,000 in a savings account.

## 'Madrid' not recommended for West

OTTAWA—Sweet clover, may be cited as an example of a variety that, although it possesses a number of desirable characteristics, has water hardness, because of this it is to be avoided in most varieties as considered.

The Atlantic Varieties Experiment Station is working on the variety that has water hardness, because of this it is to be avoided in most varieties as considered.

A single variety throws away enough feed waste to make 10 tons of waste.

The need is largely by placing the waste in large vats, allowing it to ferment, then grinding it to powder. It is then sent to the agricultural experimental station at Hagers, Nova Scotia, where it is used for poultry, cows and pigs.

Homeowners at the farm have found that most products from other clover and tall produce a poor growth response in poultry. However, hard, bristly and tall produce produce growth equal to that of the best.

The scientists believe the manufacture of feed meal will be feasible if the price can compete with that of protein such as soybean oil.

## GEMS OF THOUGHT

There never was a right answer but it succeeded. Patience and we shall win at last.

— Emerson

If I wanted to know what right, they might have had it long ago.

I have never got over my assurance that I should have been born into the most estimable place in the world, and in the very heart of time.

I must stand with anybody that stands right; stand with him while he is right, and part with him when he goes wrong.

— Lincoln

No man has a right to do as he pleases, except when he pleases to right.

— C. S. Lewis

Right against the balance beam is later.

— Mary Baker Eddy

## APPETIZING RECIPES 1-1

A wonderful meal for a Sunday in May - chicken-browned steak lamb with carrots, "sautéed potatoes," and an appetizing salad.

ROAST LAMB

1/2 lb. of lamb, bone and ribs, fat 1/2 lb. of fat, ready-to-serve

1/2 cup brown sugar, well packed

1/2 cup ketchup

1/2 cup mustard

1/2 cup vinegar

1/2 cup oil

1/2 cup salt

1/2 cup pepper

1/2 cup onion

1/2 cup garlic

1/2 cup tomato

1/2 cup corn

1/2 cup beans

1/2 cup peas

1/2 cup carrots

1/2 cup potatoes

1/2 cup mushrooms

1/2 cup onions

1/2 cup garlic

1/2 cup tomato

1/2 cup corn

**A CLOUD OF DIRTY-YELLOW SMOKE** holds up from the top of the ship's mast, forcing crews to a higher vantage point. New Navy research rocket missiles and plunges to earth less than a mile from the launch point.

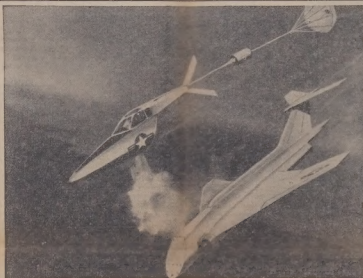

**VISIONS OF TREASURE ISLAND**—The foremast windjammer, Fata Morgana, which has been reported to have the treasure of the Spanish galleon, under full spread of canvas in Portsmouth Bay, Cornwall. This device of the days of sail is being used to give a glimpse of the German merchant marine. Built in Germany in 1905, it had a displacement of 3,155 tons.

**PARADE FOR A CHAMP**—Rocky Marciano, retiring heavyweight champion, holds his three-year-old daughter Anna, as he is paraded through his home city of Brockton, Mass. Rocky told his friends saying goodbye "I don't think when I made the decision to quit boxing how many people would be happy."

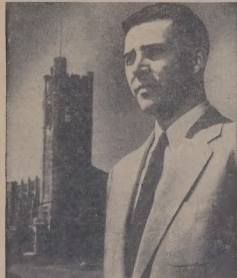

**SLIGHT EXAGGERATION**—Very slight. The camera angle at which this picture was taken is only partially responsible for the appearance of the androcentric Argentinean Jose Pombi, considered the greatest of modern producers. As Argentine heads of the size of the leaves of bread-salt to be the largest in the world, regularly. However, what the monster actually contains, half-pound of steak, two tomatoes sliced once, potatoes and beef.

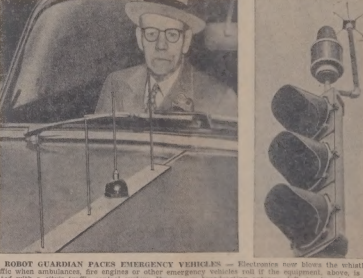

**LIFE RAFT FOR NEAR-SPACE VOYAGERS**—Pilot of this near-space craft watches body of his ship before the long 20-minute fall toward earth as he drifts free in the neutral position of the vacuum. The parachute will become effective as the almost instantaneous atmosphere thinsens in the long fall toward earth. It will slow him sufficiently to allow him to survive re-entry into the sea of air which is our atmosphere. Main change of the craft will flame across the sky as friction at supersonic speed detaches it. The sketch, above, is one artist's conception of how man will return to earth after first reaching into space toward the stars. This possible solution was offered by A. M. Mayo, Douglas Aircraft engineer, in an address made before the Aero Medical Assn. at Chicago, Ill.

**TOUR THROUGH CANALS**—Boating gardens of flowers along their banks and on their banks, these Dutch canal boatmen move through tulip fields northwest of Amsterdam. The four through canals is held in connection with Holland's spring tulip exhibition.

**WINS COTTED SCHOLARSHIP**—One of the most coveted scholarships in academic science for Canadian students, two years of advanced study at any university, has been won by Christopher Crowe, 27, of Toronto. It was announced that an overseas scholarship has been awarded the University of Western Ontario grant by the "Open Competition for Exhibition of 1951." The scholarship provides that the student may complete two years of study with no financial worries. Only two scholarships are awarded annually in Canada. Crowe may be going to Cambridge University in England.

**ROBOT GUARDIAN PACES EMERGENCY VEHICLES**—Electronic nose knows the whereabouts of traffic when emergency vehicles call for the equipment. Above, it is engaged with a city's traffic control system. Emergency broadcasting system, left, is viewed by Police Chief Jerome O'Connell, of St. Louis, Mo. Vehicle equipped with the light directional broadcasting unit projects a radio beam ahead of itself and TV-like antenna ship traffic light, right, picks up the signal. The radio beam emergency special device which set the light at "danger" and activates a flashing amber light as additional warning. Citywide installation may follow a test run of the equipment.

**PRETENDER TO THE CROWN**—Light-brown-haired champion boxer Mike Smith, as a student of his hopes for the world heavyweight championship, that Rocky Marciano has retired. Smith's next, possibly Mike, as he wants a bite of the photographer's anatomy in less of any time.

**SINGER MEETS SURGON**—Opera singer Rosalinda del Valle, 30, of Brooklyn, plans surgery for a million dollars, charging he "urgently" for surgery for operations on her case. "When the operations were scheduled in Supreme Court by Miss Valles at \$100,000, at left, is a photograph taken before the operations. At right, a photograph taken after the operations." 210

**WHO'S ON THERE?**—It isn't Bridget Murphy's brother, taking a swing at the plate between eleven-year-old Little man who says there is Father's brother Bill. He still says at home plate. The hit is his.

**TRAILER'S AMBITION**—Richard Dillay, 21, years old, tries out a barrel-race trailer, circa 1910, recently shown at an antique fair in Chicago, Ill. When asked whether it would take out to the field where he picked while she helped roll in the barrel.

**FOUND NEAR WATER**—The bald eagle is most common in the North and South. It is found near the ocean or large bodies of water where its staple food, fish, is most abundant.

**FIRST MAN**—The first man to fly an airplane over both the North and South poles was, Adm. Richard E. Byrd of the U.S.

**FINGERPRINT CORROSION**—Some exactly matched fingerprints have to be rejected because penetration from fingerprints causes corrosion.

## Wild grasses help in rust resistance

OTTAWA—The growing of rust resistant wheat varieties is of major importance to the economic welfare of a large section of the wheat growing area of Western Canada.

Wheat is a major rust epidemic stricken this region the only practical control available is to breed wheat for rust resistance.

New rust races are continually developing that are capable of attacking the most resistant varieties so that there is always an urgency for new resistant varieties to replace the old ones. One of the chief centres in the wheat breeding program at the Wheat Laboratory, Canada Department of Agriculture, according to R. C. McMillan, is to obtain new sources of resistance to leaf and stem rust.

A new source of rust resistance that appears promising is from wild grasses with a high degree of rust resistance. Several of these grasses have excellent hard wheat rust resistance and have been successfully crossed with wheat. Although the hybrids are unstable, and have reduced fertility, these problems have been overcome by repeated backcrossing to the wheat parent.

By crossing seed of hybrids with X-ray or other sources of irradiation, it is possible to break up the grass chromosome (which they carry) and attach a piece of grass chromosome to the wheat chromosome. In this way rust resistance can be transferred from grasses to wheat.

Seed of rust resistant Agropyron and Bromus hybrids, has been crossed, and microscopic investigation of the chromosomes in the irradiated plants indicate that the transfer of resistance to wheat has been successful.

At the present time several advanced selections appear quite promising. They are rust resistant, fully fertile and closely resemble the wheat parent.

Field studies will be conducted this season under severe drought conditions, and quality data will be obtained on the resistant lines. Should these lines continue to demonstrate superior rust resistance and also have high yields, then a new source of rust resistance will be available to wheat.

## Cotton reigns as queen of summer fabrics

One again, cotton is queen of summer fabrics. And nobody will be too it like blooms fresh in third-printed cottons like these. At right is a nubby in the city cotton dress, left, bedecked with floral prints.

### Many Canada's delegation to textile assembly

OTTAWA—Canada's delegation to the Ninth Assembly of the World Textile Organization, meeting in Geneva for three weeks commencing May 8, was announced by the Minister of Trade, Mr. Martin.

Mr. Martin said that the delegation will be headed by the deputy minister of National Health, Dr. C. D. W. Cameron.

Other members of the delegation include Mr. R. B. Balcom, P.M. for Halifax, Dr. P. Burns, Minister of Public Health, and Mr. M. Perry, Chief Nursing Consultant of the department of National Health and Welfare, Mr. Martin.

The Ninth Assembly is expected to consider manifold problems arising from the economic situation, and is one of the largest textile assemblies ever held.

The assembly is the premier body of the World Textile Organization, which coordinates textile activities in the health field on a global basis.

### Lac La Ronge provides fabulous sport fishing for visitors seeking action

LA RONGE—The chances are good that you can make any fish story come true at Lac La Ronge.

This 400-square-mile lake, with its 1,300 miles of shoreline, is one of the most beautiful fishing spots in the world.

Although Saskatchewan's sport fishing season opened May 12, Lac La Ronge has been open since May 25. Last week's weather has made the lake a real fishing spot.

The big lake, large population is due partly to the fact it is one of northern Saskatchewan's best water areas for combined trout, lake and rainbow trout fishing.

Several fish taken here have won top honors in Canadian and American competitions and in the last few years have won several prizes.

There are many reasons why Lac La Ronge is a great fishing spot. The lake is 400 miles long and 100 miles wide. It has a shoreline of 1,300 miles.

## Experiments in beef cattle breeding at Manyberries

OTTAWA—Beef cattle breeding research at the Research Department of Agriculture, Manyberries, Alberta, includes projects on testing Highland and Highland x Hereford cattle and on breeding with the Hereford, Angus and Shorthorn breeds.

The Highlands on test at Manyberries appear quite healthy, but even lower than those of Hereford.

Hereford, Shorthorn and weaning weights of Highlands have, so far, been lower than those of Hereford.

In 1953, Highland bulls were crossed on selected Hereford cows and a group of 100 calves was born. All stores of this group in the herd.

The first yearling calves were weaned on October 15, 1953. The calves were weaned on October 15, 1953. The calves were weaned on October 15, 1953.

**Be Sure Insure Against... HAIL**

**With ALBERTA HAIL BOARD INSURANCE**

What would you do if your 1955 crop was suddenly destroyed by hail? Would you dig this thing down hard-earned savings or mortgage your future farm income to meet living expenses, pay \$100 and send the 1957 crop? Why run such a risk?

**Alberta Hail Board Insurance Provides Protection At Cost**

The Board's 1955 plan provides the following improvements:

- (1) Payment in full of claims at time of adjustment — no waiting until spring for your money.
- (2) No deposit required when you apply for your insurance.
- (3) 5% DISCOUNT on cash paid with application.

YOUR PREMIUM IS A DEDUCTIBLE EXPENSE FOR INCOME TAX PURPOSES.

**FOR SALE**

Two-room house and lot, with garage, in Delia, next to Crown Lumber. Apply to A. Whitman, phone 91724, Delia. 25-5c.

**Land for Sale**

Acres for sale, N.W. Delia, on water line. See M. Brannan, Delia. 25-5c.

**WAGE DEMANDS**

Prosperity of U.K. like that of Canada, depends in marked degree upon exports, prices for which must be competitive if export markets are to be sustained.

Little wonder, therefore, that British Labor Minister Ian Macdonald faces consequences of rising prices, resulting from excessive wage demands, effect of which is to prejudice U.K.'s competitive position in world markets. In first four months of 1956, British Labor Minister points out, wage increases have lifted production costs in U.K. by more than \$700,000,000, as much as total increase of production costs in entire 12 months of 1955.

In Canada, spectre of wage inflation leading to recession and unemployment is no less real. Wage increases already in effect, and wage demands pending in this country at present time, tote up to hundreds of millions of dollars, and are certain before long to be reflected in prices for goods and services, to inevitable detriment of every citizen.

Unfortunately, Labor Minister Gregg has shown not the slightest indication that wage restraint is no less necessary to Canada's economic wellbeing than to economic wellbeing of U.K.

Canada has the highest per capita production of any country in the world.

British Columbia spends more per capita on tobacco than any other Canadian province. But it has the lowest proportion of people who can name their Members of Parliament.

**Local and District**

Mr. Frank Trout is the president in the Drumheller Municipal Hospital.

Mr. and Mrs. J. Eberle, were Sunday visitors at the home of Midlandville.

Miss Carolyn Schoeppe, who is training at the General Hospital, Calgary, was a visitor in Delia over the week end.

Mr. and Mrs. Thomas, of Calgary, were week end visitors at the home of Mr. and Mrs. Frank Isaac.

Hanna was defeated by the Delia Senior baseball team on Friday evening. The score was 5-3.

The Delia United and Majestic Sunday Schools are holding a joint picnic Sunday, June 24th, at Motok's picnic grounds. Everyone welcome.

Harold Goldthorpe, of Veteran, Alta., was the guest of Mr. and Mrs. Wm. Hall on Wednesday and Thursday.

Mr. and Mrs. Rotzoll and son, of Midlandville, were week end visitors at the home of her parents, Mr. and Mrs. Wm. Hall.

Brian Peters, who is attending Mount Royal College, Calgary, was a visitor at the home of his parents, Mr. and Mrs. J. Peters.

Miss Margaret Staples and a girl friend, who are in training for nurses at Ponoka, were week end visitors at the home of the former's parents, Mr. and Mrs. L. Staples.

Mr. McNeill, of Calgary, is visiting her daughter and son-in-law, Mr. and Mrs. F. Isaac.

Mr. and Mrs. George Parquharson, and two small sons, accompanied by the former's mother, Mrs. G. Parquharson, of Ponoka, B.C., were motor visitors in Delia last Thursday.

Cranes graduate awards for the outstanding girl and boy students went to Catherine Neish-erston and Harold McInderry at the Senior High School graduation exercises held at Pentstemon, B.C., on the evening of Thursday, June 7th. Miss Neish-erston is a daughter of Dr. F. J. and Mrs. Neish-erston, formerly of Delia.

Starting with an electric storm Wednesday evng., copious rains fell almost continuously over Delia and district for a couple of days last week. Everywhere was flooded, especially along Main Street, which was in a quagmire owing to work being in progress on the new water and sewage system. The rain came just in time, and will be of great benefit to crops, that were suffering from lack of moisture. It has dried up fast and is now sunny and hot at this writing (Tuesday), with the temperature in the 80's.

**RADIO**

The following are among the high lights of programs to be heard on CBC stations on Thursday, Friday, Saturday and Sunday, June 21, 22, 23, and 24. All times mentioned are approximate Standard Time.
